

William Barr
Attorney General
U.S. Department of Justice

June 20, 2020

Founding Spirit: Emergency Aid for defeating the Deep State, restoring the Constitution, and realizing the Founders' Vision.

Dear Attorney General.

We are witnessing the end of a paradigm. The escalating tension between the left and the right is tearing apart the social fabric, and only to the extent that common ground is found can the United States survive.

As an organization dedicated to the rule of law, we are uniquely positioned to assist in this quest.

While conservatives are correct to defend individual rights against the onslaught of collectivism, liberals are right to focus on the good of society and wholesome values. The system itself, after all, has failed to protect both. It has been occupied by factions vying for power. This has turned systems of justice into structures of arbitrary law, and the increasing divide has to do with a loss of faith in authority. It also has to do with a wrecked moral compass, and we hereby provide the tools needed to find a common ground.

Indeed, as humanity is inspired by wholesome values, ideal, and principles, the perceived gap between conservative values and liberal ideals is a cultural delusion. Unconsciousness, then, has been the cause of much suffering, and so enclosed you will find *To Right a Wrong: A Transpersonal Framework for Constitutional Construction (2016)* and *Human Rising: The Prohibitionist Psychosis and its Constitutional Implications (2019)*.

As you will see, these documents are key to your quest. If you want to hold your ground against critics, you must ensure the best possible foundation of law, and these manuscripts provide the basis needed to (1) understand the spirit that made America and (2) the reasons why we fall short to our ambition.

The first book completes the discipline of constitutional interpretation, adding psychology to the already accepted terrain (that of political theory). The first of its kind, it is a 101-guide to a more well-oiled social machinery, and to the extent that the general lay-out becomes known we can create a heaven on earth.

Certainly, for those without hidden agendas, principled reasoning is easy to understand. And while *To Right a Wrong* ensures a foundation for integrity building at the nation-level, one that critics cannot refute, *Human Rising* not only documents the parallels between the War on Drugs and

former mass movements gone wrong; it shows how the morality of the prophets and the founders were one and the same, thus elaborating on the map to utopian societies.

These books have been embraced by professionals and have the potential to bring humanity one step further. The latter has been accepted by the Organization of American States, European Union, and the Council of Europe as a report documenting large-scale and ongoing human rights violations. 200 copies have been delivered at the UN—and they are taking it seriously.

As to the Trump administration, I believe a special treat will be the chapters on powerpolitics, as they expose illegal activities of the Deep State during the Iran Contra years. Among the individuals named are the Clintons, and as you know the web of corruption runs deep.

Luckily, with the Trump administration, there is a window of opportunity for rooting out evils and making the systemic adjustments needed to truly make America great again. Without a foundation of principled law, however, this is impossible, and in part 3 of *To Right a Wrong*, you will find a case study which details how the US justice system has denied drug users constitutional guarantees. Professor Douglas Husak of Rutgers University has noted that the Attorney General should be confronted with its contents, and now you have.

You now have in your possession material revealing how drug prohibition is historically similar to other mass-movements gone wrong in that it is the result of scapegoating, humanity's tendency to blame politically weak groups for problems that are a collective responsibility. As humanity matures, we must do away with this great force of injustice. As shown in *Human Rising*, it is this mechanism that has kept us from fulfilling the founders' vision, and if the US system of Justice shall abide by its mandate accepting (or refuting) the implications of this work is essential.

While recent constitutional courts like Georgia, South Africa, and Mexico are a reminder that drug users have rights, and that the state has a duty to ensure to them an effective remedy, our organization has long been unique in focusing on principled reasoning and the disconnect between human rights and the prohibition paradigm. We have been pushing for a solution to this problem for years, and we are hopeful that the U.S. Department of Justice will rise to the challenge.

Indeed, if your loyalty is to principle, not policy, this is another breaking point in the history of America. Building upon this framework, you can not only remedy the problems of increasing hostility between police and society, as demonstrated by the Flynn riots. You also have the tools needed to do away with the legal tradition that has created so much mischief, and to ensure that the final revolution—that of constructive social engineering—can begin.

Yours sincerely,

A handwritten signature in black ink that reads 'Roar Mikalsen'. The signature is written in a cursive, flowing style with a prominent 'R' and 'M'.
